ORDER

The Poringalkuthu old power house was originally commissioned during 1957 -1960 with an installed capacity of 32 MW (4x8MW) and re-commissioned after renovation, with an enhanced capacity of 36 MW (4x9 MW) during 2014-15. The dismantled parts of Unit #1 & 2 machines were survey reported and disposed as per order read as 1st paper above. The dismantled parts of Unit #3 & #4 machines were survey reported, but the disposal was delayed due to various reasons.

The Chairman, Scrap Disposal Committee, GPC as per letter read as 4th paper above reported the difficulties faced while proceeding with the disposal of the dismantled Generator parts of 8 MW unit #3 and #4 machines. Survey report was originally sanctioned by the Chairman, SDC , for the subject disposal with a condition that, *"the tender cum auction for the disposal of materials under survey report shall be conducted on per kg rate basis in as is where is condition and the weight of the items shall be taken including insulation and other materials"*. Accordingly, tender cum auction was conducted for the disposal of dismantled generator parts of Units #3 & #4. But, nobody participated in the auction, due to the difficulty involved in separating the combined unit of main pole(12790kg) and spider with rotor shaft (15831 kg) of Unit#3 & Unit #4. Therefore, direction was obtained for separating the units departmentally and to re-tender the same after revising the survey report, based on the present rate. In order to explore the possibility of getting higher value of the scrap items, the Chairman, SDC has directed to arrange re-tender cum auction for the disposal of the two sets of main field poles(25580kg) and 2 sets of spider with rotor shafts (31663.8 kg) .

Subsequently, re-tender cum auction was arranged on 05-10-2018. Though 17 persons registered for the auction, nobody responded in the auction .Hence, the Chairman, SDC has suggested for re-auction of the items as a single machine part (2 Nos. of rotor) through e-auction process. As directed, revised SR was prepared by taking the total weight of each combined units and assessed the value as Rs.33,39,031/-. Considering the difficulties faced in the auction process, the above SR was sanctioned as per paper read 2nd above and recommended for e-auction. As the e-auction process is being carried out centrally, from the office of the Chief Engineer (SCM) through M/s MSTC Limited, based on a Selling Agency Agreement and the subject items are not in the current list of scrap items specified for e-auction, sanction was requested for the disposal of the combined unit of main field poles and spider with rotor as a single unit of the dismantled generator parts of 8MW unit #3 and #4 machines at old power house, Poringalkuthu, through e-auction.

The matter was placed before FTD vide paper read as 5th paper above .Having considered the matter in detail, the Full Time Director's meeting held on 06-06-2019, resolved to accord sanction to dispose the combined unit of Main Field Poles and Spider with Rotor as a single unit of the dismantled Generator parts of 8MW unit #3 and #4 machines at old Power House, Poringalkuthu through e-auction, by the Chief Engineer(SCM), as requested by the Chairman , Scrap Disposal Committee, GPC.

Orders are issued accordingly.

By Order of the Full Time Directors,
Sd/-
(LEKHA.G)
Company Secretary
(In -charge.)
