## **AnjaliOldLipi font installation and setup in linux**

### **OPTION – 1**

Create a directory for meera font, say, `/usr/local/share/fonts/ttfanjali`

```
mkdir /usr/local/share/fonts/ttfanjali
```

```
cp AnjaliOldLipi.ttf /usr/local/share/fonts/ttfanjali
```

```
ttmkfdir -o fonts.scale
```

```
cd /usr/local/share/fonts/ttfanjali
```

```
head -1 fonts.scale > fonts.dir
```

```
tail +2 fonts.scale | tac >> fonts.dir
```

```
cp fonts.dir fonts.scale
```

```
xset +fp /usr/local/share/fonts/ttfanjali
```

To verify that the font is installed properly,

```
xset q
```

```
xfonstsel
```

## **OPTION – 2**

If you are using a KDE desktop, start the 'KDE Control Centre'. Under 'System Administration', there is a 'Font Installer' utility. Switch to the Admin mode to install the new font from the font installer.
